Fight For Your Right To Repair

Our world has been built around big corporations which suck up profits for faceless shareholders.

They sell us products made by people across the world, their work automated into a meaningless slog of sweatshop exploitation. Industrial waste is dumped into the earth, sky and sea. It's a disposable culture. Cars and fridges get cheaper but they're computerised, so home maintenance is near impossible. Phones get outdated. Even simple kettles seem to last only a year. The nasty little secret is built-in obsolescence. Some devices are designed to fail.....read more;
